

Transportation Improvement Program

**Clark County
2017-2020**

Prepared by
Southwest Washington
Regional Transportation Council
P.O. Box 1366
Vancouver, Washington 98666-1366

October 2016

STAFF REPORT/RESOLUTION

TO: Southwest Washington Regional Transportation Council Board of Directors
FROM: Matt Ransom, Executive Director 
DATE: September 27, 2016
SUBJECT: **2017-2020 Transportation Improvement Program, Resolution 10-16-24**

AT A GLANCE - ACTION

The purpose of this resolution is to seek RTC Board adoption of the 2017-2020 Transportation Improvement Program (TIP). The recommended action was endorsed by the Regional Transportation Advisory Committee (RTAC). The TIP was developed in accordance with federal requirements. The TIP programs regionally significant projects totaling approximately \$219.3 million, including approximately \$96.3 million in federal transportation funding.

INTRODUCTION

As the Metropolitan Planning Organization for the Clark County region, RTC is required to develop a financially constrained regional Transportation Improvement Program (TIP). The requirements for the TIP are established in federal surface transportation legislation.

The Full Draft of the 2017-2020 Transportation Improvement Program is provided on line within the October 2016 RTC Board materials and printed copies will be available at the October RTC Board meeting.

The 2017-2020 Transportation Improvement Program is a four-year program of regionally significant transportation projects and indicates commitment for funding on these projects. Projects programmed in the TIP are drawn either directly from specific project recommendations made in the Regional Transportation Plan (RTP) or are developed from a more general series of recommendations (e.g. preservation, maintenance, safety, etc.).

In September, the Regional Transportation Advisory Committee (RTAC) reviewed the draft 2017-2020 Transportation Improvement Program (TIP) and has recommended adoption by the RTC Board of Directors. In January, the 2017-2020 regional TIP becomes part of the 2017-2020 State Transportation Improvement Program (STIP). Projects must be listed in the STIP to receive authorization for the use of federal transportation funds.

PROJECT REVIEW

While some of the projects programmed in the TIP are selected for funding by the RTC Board, many of the projects programmed in the TIP are selected for funding through other processes. No matter the source of funding, RTC staff reviews all projects to ensure that each project is consistent with the Regional Transportation Plan (RTP), air quality requirement, local

comprehensive plans, financially constrained, provide a reasonable timeline, and with other state and federal requirements.

2017-2020 TRANSPORTATION IMPROVEMENT PROGRAM ADOPTION

Adoption of the 2017-2020 Transportation Improvement Program (TIP) will include the following actions:

- Programs regionally significant projects totaling approximately \$219.3 million, including approximately \$96.3 million in federal transportation funding.
- The first two years of projects programmed in the TIP are considered selected projects and can proceed towards implementation, within statewide management of obligation limits.
- Certification that the RTC planning process is being carried out in accordance with all applicable federal requirements.
 - The TIP development process meets federal public participation requirements and that a 30-day public comment period was provided.
 - All projects proposed for Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) funding do not exceed the proposed funding levels available within a program year.
 - TIP consistency with the Regional Transportation Plan, Congestion Management Process, Clean Air Act as amended, the Air Quality State Implementation Plan, and Conformity Guidelines.

POLICY IMPLICATION

The 2017-2020 Transportation Improvement Program (TIP) is a four-year program of regionally significant transportation projects in the Clark County region. Projects programmed in the TIP are consistent with state and federal requirements, and assist the region in implementing the overall long-range Regional Transportation Plan (RTP).

BUDGET IMPLICATION

Approval of the 2017-2020 Transportation Improvement Program (TIP) will program 69 regionally significant projects, representing approximately \$219.3 million in transportation investment over the next four years within the Clark County, Washington region.

ACTION REQUESTED

Adoption of Resolution 10-16-24 "2017-2020 Transportation Improvement Program."

ADOPTED this _____4th_ day of _____ October _____ 2016,
by the Southwest Washington Regional Transportation Council.

Title VI Compliance

The Southwest Washington Regional Transportation Council (RTC) assures that no person shall, on the grounds of race, color, national origin, or sex as provided by Title VI of the Civil Rights Act of 1964 and the Civil Rights Restoration Act of 1987 (P.L. 100.259), be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity. RTC further assures that every effort will be made to ensure nondiscrimination in all of its programs and activities, whether or not those programs and activities are federally funded.

Americans with Disabilities Act (ADA) Information

Materials can be provided in alternative formats by contacting the Southwest Washington Regional Transportation Council (RTC).

Location of Clark County

Southwest Washington Regional Transportation Council (RTC) is the Metropolitan Planning Organization (MPO) for Clark County, Washington. Clark County is located in the southwestern part of Washington State on the Columbia River, approximately 70 miles from the Pacific Ocean. The Columbia River forms the western and southern boundaries of the County. Urban Clark County is part of the northeast quadrant of the Portland, Oregon metropolitan area.

Figure 1: Location of Clark County, Washington

Figure 2: Transportation Boundaries

Transportation Boundaries

Chapter 1: Introduction

BACKGROUND AND PURPOSE

The Transportation Improvement Program is composed of transportation projects, to be implemented in the next four years that address the regional transportation system needs within Clark County, Washington. Only regionally significant projects that plan to obligate funds within the next four years are included in the TIP. If a project has already obligated funds, will obligate funds after four years, or if funds are not secured, the project is not included in the TIP. The TIP includes a priority list of projects to be carried out in each of the next four years and a financial plan that demonstrates how it can be implemented. The purpose of the TIP is to demonstrate that available transportation resources are being used to implement the region's long range transportation plan.

A Transportation Improvement Program must be developed for each metropolitan area by the Metropolitan Planning Organization (MPO) in cooperation with the State and transit operators. The Southwest Washington Regional Transportation Council (RTC) is the federally designated MPO for the Clark County, Washington region. RTC is the lead agency for transportation planning and decision-making for the region. The TIP is generally prepared each year, but must be updated at least every four years. The TIP process is used to determine which projects from the Regional Transportation Plan will be given funding priority year by year.

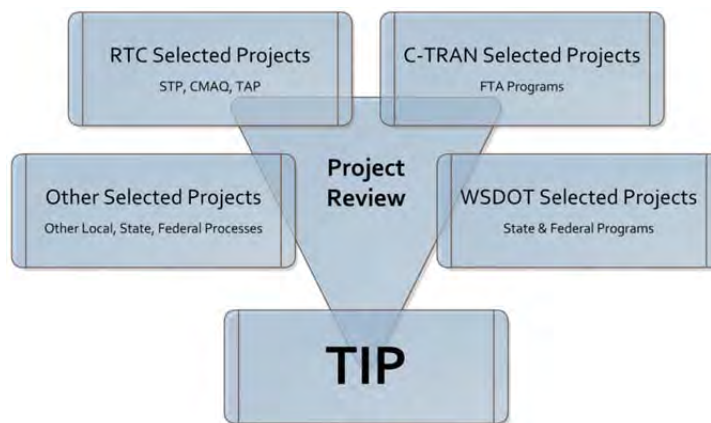

TIP DEVELOPMENT

Process

The RTC Transportation Improvement Program is a product of the regional transportation planning process, which is conducted cooperatively by RTC, the Washington State Department of Transportation, local general-purpose governments, and C-TRAN. Although federal transportation revenues are prioritized through federal, state, and regional processes, all projects are programmed through the regional decision making process. No matter the source of funding, RTC reviews all project to ensure the following before programming the project in the TIP

- ◆ Consistency with Regional Transportation Plan
- ◆ Air Quality Conformity
- ◆ Consistency with local comprehensive plans
- ◆ Consistency with other federal and state requirements
- ◆ Funds are reasonably expected to be available
- ◆ Reasonable timeline for project implementation

Figure 3: TIP Development Process

A Draft Transportation Programming Guidebook has been developed and is available from the RTC website as a resource document for local agencies in the region. The Guidebook provides member agencies background information, policies, and procedures for the development of the region's Transportation Improvement Program.

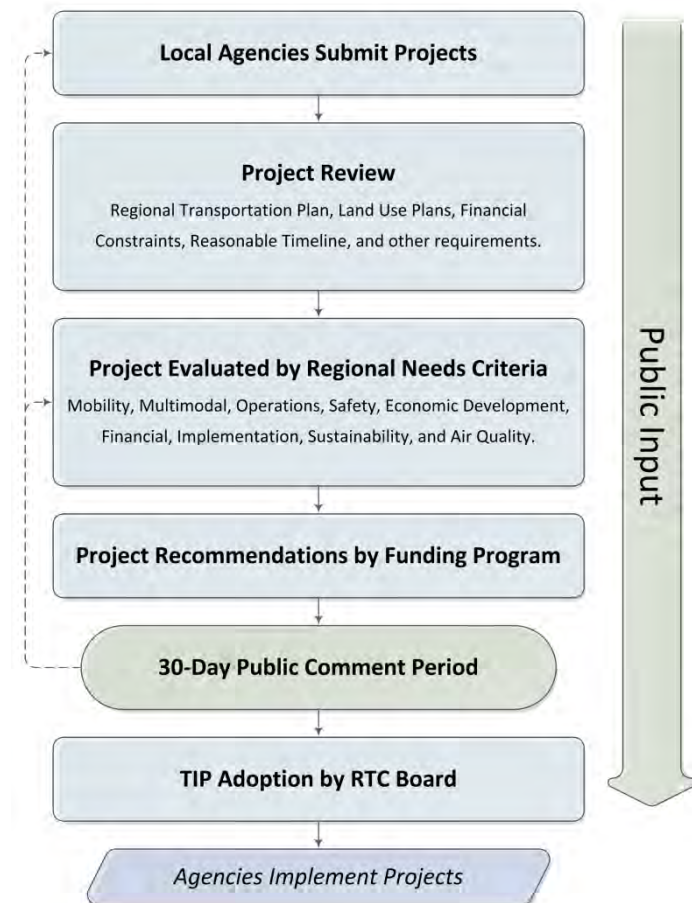

Regional Project Development Process

RTC, in consultation with member agencies, is responsible for selecting project for the regional allocation of federal highway funds. This includes the regional allocation of Surface Transportation Program (STP), Congestion Mitigation and Air Quality (CMAQ), and Transportation Alternatives Program (TAP) funds.

The overall regional project development process approach is founded on the current federal transportation reauthorization act. The Regional Transportation Plan is utilized as the framework plan, system needs analyses are incorporated, projects are evaluated and prioritized against a set of criteria, and funding resources are identified to meet project needs.

At the regional level, the needs criteria are intermodal/multimodal and address project funding across federal funding categories. The criteria support the implementation of the Congestion Management Process. The needs criteria reflect the system performance goals and measures from the Regional Transportation Plan. The wider range of criteria includes Mobility, Multimodal, Safety, Economic Development, Financial/Implementation, and Sustainability/Air Quality. Funding flexibility is addressed to identify funding resources to meet project needs. Generally, funds are not transferred between funding sources at the regional level.

Figure 4: Regional Project Development Process

Coordination with adjacent MPOs

Clark County, Washington forms part of the Portland-Vancouver metropolitan area, the remainder of the metropolitan area being in the state of Oregon. Coordination and cooperation in transportation planning activities between the two states are afforded by cross-representation on transportation technical and policy committees and by coordination in the development of the Regional Transportation Plan, Transportation Improvement Program, and Unified Planning Work Program.

Public Involvement Process

RTC is committed to a public involvement process that is proactive, supports early and continuous participation, provides timely information, reasonable public notice and time for public review, public access, makes information available on Web, and uses visualization techniques. In addition, RTC holds and attends meetings and considers public suggestions and recommendations received during the development process. The process for updating and amending the TIP is directed by procedures contained in RTC's Public Participation Plan.

Federal transit and highway planning regulations governing the metropolitan planning process require RTC to include a public participation process when developing the Transportation Improvement Program. The Federal Transit Administration also requires that RTC's public participation requirements associated with the development of the Program of Projects (POP) for Section 5307 must meet certain requirements. The Transportation Improvement Program and Public Participation Plan satisfy the public participation requirements for the POP. Public notices of public involvement activities and times established for public review and comment on the TIP state that they satisfy the POP requirements of the Section 5307 program.

The TIP is also developed from the adopted local transportation improvement programs compiled annually by each agency. As required, each local agency conducts a public involvement process in the development and review of their local TIP. These processes vary by jurisdiction, but all culminate in a formal public hearing prior to adoption by the local governing boards. While the individual local TIPs have included a public involvement process, RTC continues this public involvement process for the TIP as outlined in RTC's Public Participation Plan.

Citizens and appropriate parties were provided a reasonable opportunity to comment on the TIP through a public involvement process. A TIP public comment period lasting from August 31, 2016 until October 4, 2016 was provided. The draft TIP document and project information was made available during the public

comment period. Notices of the opportunity to comment on the TIP were distributed to the local media, neighborhoods, and other interested parties. News releases and other TIP information were made available on the RTC Website. From June 2016 through October 2016, public discussions of the TIP were held during public meetings of the RTC Board of Directors, RTAC (technical committee), and other public outreach efforts. Public comments received during the comment period will be compiled and addressed in the appendices for the Transportation Improvement Program.

TIP Administration

Occasionally changes need to be made to the TIP following its adoption. Federal regulations permit changes to the TIP if the procedures for doing so are consistent with federal requirement. Changes can include project cost adjustment, scope changes, addition of projects, and more. When a change is requested it will be identified as an Update, Administrative Modification, or TIP Amendment. The process for incorporating the change into the TIP differs by the type of change and the regional action that is required. Changes to the TIP can be submitted monthly between December and September. Written requests for changes to the TIP are due to RTC eight days prior to the Third Friday of each month; which is usually the second Thursday.

Updates do not substantially change a project and can be handled administratively by RTC Staff. Administrative Modifications are moderate changes that require approval from the RTC Executive Director. Amendments are substantial changes to projects that require action from the RTC Board of Directors.

RTC's TIP administration processes will be carried out through RTAC and RTC Board meetings, consistent with the Public Participation Plan. It is important to note that in some cases the RTC TIP administration process may differ from that of the State. These TIP Administration processes are further explained and procedures are outlined below:

TIP Administration Process

The TIP Administrative Modification and Amendment process includes the following steps:

1. Project sponsor submits written request to RTC for change, including submitting a modified State Transportation Improvement Program (STIP) record within the online STIP database. The written request should provide sufficient detail to understand the requested change and reason for change.
2. RTC staff reviews request to ensure that all needed information is provided and determines the type of action that is required. The request is also reviewed for financial feasibility, air quality conformity, consistency with the RTP and other state and federal requirements, etc.

3. Administrative Modifications and Amendments are posted on the RTC website: (<http://rtc.wa.gov/programs/tip/amendments>).
4. If request is an Administrative Modification, the RTC Executive Director takes action. If approved, staff will change the regional TIP and submit the change to WSDOT for inclusion in the STIP. RTAC is notified of the Administrative Modification.
5. If request is an Amendment, RTAC reviews the change and makes a recommendation to the RTC Board. If the RTC Board approves the change, staff will change the regional TIP and submit the change to WSDOT for inclusion in the STIP.
6. Once Administrative Modifications and Amendments are submitted to WSDOT, they are reviewed by WSDOT staff, approved by the Governor's representative, and receive final approval by FHWA and FTA.

Updates

Updates do not substantially change a project and do not require the TIP to be changed. This could include the following:

- ◆ Moving a project within the four years of the TIP.
- ◆ Changes in federal funding source(s).
- ◆ Adjustment in a project's funding to meet award of contract.
- ◆ Moving selected dollars back to next project phase (Preliminary Engineering to Right-of-Way or Right-of-Way to Construction).

Administrative Modification

Projects that meet the following conditions can be administratively modified into the TIP at the discretion of the RTC Executive Director.

- ◆ Revision to lead agency.
- ◆ Adding a prior phase of a project not previously authorized.
- ◆ Changes or errors in project information.

- ◆ Changes in federal funding amounts less than \$3 million (STIP Amendment required if change to total program amount is greater than 30%).
- ◆ Addition of federal aid project or project phase that has approval from granting agency and does not exceed \$3 million in federal funding (STIP Amendment Required).
- ◆ Deletion of project (STIP Amendment Required).
- ◆ Restoration of project to the TIP that was included in a previous version of the TIP (STIP Amendment Required).

Amendments

Projects that meet the following conditions will require an amendment and approval from the RTC Board of Directors:

- ◆ Adding a new project, future project phase, or funding amount greater than \$3 million in federal funding.
- ◆ Adding a regionally selected project or adding regionally selected federal funds to a project.
- ◆ Major scope changes.
- ◆ Changes to a project that affects air quality conformity.
- ◆ Changes to project's total programming amount that exceeds \$3 million.

Transportation Alternatives Program (TAP) Process

The TAP funds are allocated to RTC for the Clark, Skamania, and Klickitat County region, with varying amounts being allocated to U.S. Census defined urban and rural areas. The TAP program is used for community improvements such as pedestrian and bicycle facilities, viewing areas, and other qualifying activities.

Selection of TAP projects is accomplished through the regional planning process and generally begins in the spring of each odd year (2017, 2019, etc.). The process includes the following steps: 1) Call for projects, 2) Applications received by deadline, 3) Evaluation of projects using regional criteria, 4) RTAC recommends a ranked list of projects for funding, and 5) RTC Board selects and programs a list of projects for funding.

MPO CERTIFICATION STATEMENTS

The transportation planning process carried out by the Southwest Washington Regional Transportation Council (RTC), as the MPO for the Washington portion of the Portland-Vancouver Metropolitan Area, is certified for funding under FHWA programs and for planning, operating, and capital assistance under FTA programs. The Washington State Governor designated RTC as the MPO, on July 8, 1992.

In accordance with 23 CFR Part 450, §450.334, the Washington State Department of Transportation (WSDOT) and the Southwest Washington Regional Transportation Council (RTC), Metropolitan Planning Organization (MPO) for the Washington portion of the Portland-Vancouver Metropolitan Planning Area (MPA), hereby certify that the metropolitan transportation planning process is being carried out in accordance with all applicable requirements including:

1. 23 U.S.C. 134, 49 U.S.C. 5303, and this subpart;
2. In nonattainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93;
3. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
4. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
5. Section 1101(b) of the SAFETEA-LU (Pub. L. 109-59) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
6. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
7. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, 38, and 28 CFR Part 35;
8. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
9. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.
11. Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 CFR part 200).
12. USDOT and WSDOT supplemental fiscal directives regarding Indirect Cost Proposals.

CONSISTENCY WITH REGIONAL TRANSPORTATION PLAN

The Regional Transportation Plan (RTP) identifies and recommends highway, transit, and other transportation related improvements needed to ensure an adequate level of mobility for Clark County. Projects included in the Transportation Improvement Program (TIP) are drawn either directly from specific recommendations made in the Regional Transportation

Plan, or developed from a more general series of recommendations (e.g. preservation and maintenance of transportation facilities, traffic safety improvements, facilities for bicycles and pedestrians, system management, demand management, etc.). The project-sponsoring agencies develop specific project proposals which are consistent with the RTP recommendations.

Only projects consistent with RTP are included in the TIP as required by federal law. This means that even fully funded projects would be excluded from the TIP if they were inconsistent with the RTP. Projects are reviewed for consistency with the RTP, as they are considered for inclusion or amendment into the TIP.

CONSISTENCY WITH CONGESTION MANAGEMENT PROCESS

The Congestion Management Process (CMP) is a federal transportation planning requirement. The purpose of the Congestion Management Process is to apply strategies that can improve transportation system performance and reliability. The Congestion Management Process provides accurate, up-to-date information on transportation system performance. Overall, the Congestion Management Process supports the long-term transportation goals and objectives as contained in the Regional Transportation Plan.

RTC prepares an annual monitoring report for the Congestion Management Process. The Congestion Management Process monitoring report addresses travel time, speed, vehicle occupancy, intersection delay, transit, mode choice, and other performance measures. The annual report serves as a tool for monitoring the region's traffic congestion and provides information to help guide the investment of transportation funds.

CONSISTENCY WITH AIR QUALITY STATE IMPLEMENTATION PLAN (SIP)

Introduction

Required under the Federal Clean Air Act, the State Implementation Plan (SIP) provides a blueprint for how areas will attain and maintain the National Ambient Air Quality Standards (NAAQS). Demonstrating that the RTP and the TIP conform to the SIP is required by the Federal Clean Air Act, the Moving Ahead for Progress in the 21st Century (MAP-21), and the Clean Air Washington Act. Positive conformity findings allow the region to proceed with implementation of transportation projects in a timely manner.

For regions that are designated as nonattainment or maintenance areas, transportation conformity is a mechanism for ensuring that transportation activities, plans, programs and projects are reviewed and evaluated for their impacts on air quality prior to funding or approval. The intent of transportation conformity is to ensure that new projects, programs, and plans do not impede an area from meeting and maintaining air quality standards. Specifically, regional transportation plans, improvement programs, and projects may not cause or contribute to new violations, exacerbate existing violations, or interfere with the timely attainment of air quality standards.

On March 15, 1991, the U.S. Environmental Protection Agency designated the urban area of the Vancouver portion of the Portland- Vancouver Interstate Air Quality Maintenance Area as a Marginal non-attainment area for the 1-hour ozone (O₃) NAAQS and a Moderate carbon monoxide (CO) non-attainment area. This action was taken in accordance with Section 107 of the Federal Clean Air Act as amended in 1990.

The Southwest Clean Air Agency (SWCAA) developed, as supplements to the State Implementation Plan, two Maintenance Plans; one for Carbon Monoxide (CO) and another for Ozone (O₃). In October 1996, the Carbon Monoxide Maintenance Plan and in April 1997, the Ozone Maintenance Plan were approved by the Environmental Protection Agency (EPA). Mobile source strategies contained in the Maintenance Plans were endorsed for implementation by the RTC Board of Directors (Resolution 02-96-04).

Air Quality Status

Under both the 1997 and 2008 8-hour ozone NAAQS, the Vancouver/Portland Air Quality Maintenance Area (AQMA) was designated "attainment." As of the revocation of the 1-hour ozone NAAQS on June 15, 2005, regional emissions analyses for ozone precursors in the Plan (RTP) and Program (TIP) were not required.

The Vancouver AQMA was redesignated to attainment for the CO NAAQS with an approved 10-year maintenance plan in 1996. In January 2007, the Southwest Clean Air Agency submitted a Limited Maintenance Plan (LMP) for CO to the Environmental Protection Agency for the second 10-year period. The EPA approved this LMP the following year. Based on the population growth assumptions contained in the Vancouver Limited Maintenance Plan (LMP) and the LMP's technical analysis of emissions from the on-road transportation sector, it was concluded that the area would continue to maintain CO standards.

As of October 21, 2016, the Vancouver AQMA successfully completed the 20-year "maintenance" period and is no longer required to make a conformity determination.

Applicable State Implementation Plan

The latest approved SIP for the Vancouver Air Quality Maintenance Area is the second 10-Year Limited Maintenance Plan for Carbon Monoxide approved by the EPA (73 FR 36439; June 27, 2008). On November 19, 2007, EPA published a Federal Register notice of the adequacy of the CO Limited Maintenance Plan for conformity purposes. Despite successful conclusion of the 20-year maintenance period, the control measures in the approved SIPs remain in place.

Air Quality Coordination

Although it is not mandatory, RTC will continue to coordinate and cooperate with air quality consultation agencies (Washington State Department of Ecology, EPA, FHWA, FTA, WSDOT, and SWCAA) when needed on any new regulatory and technical requirements that may affect the AQMA as well as emerging issues related to air quality and transportation. RTC will consult with the agencies, as requested, in the review, update, testing, and use of the Motor Vehicle Emissions Simulator emissions model to ensure accuracy and validity of model inputs for the Clark County region and consistency with state and federal guidance.

On-Road Emission Reduction Strategies

The State Implementation Plan (SIP) for Washington State includes an enhanced I/M vehicle emissions testing program for the Vancouver portion of the Portland-Vancouver Air Quality Maintenance Area. Washington's vehicle emission inspection program was added to the Vancouver urban area in 1993 and expanded to Brush Prairie, Battle Ground, Ridgefield and La Center in 1997.

Although not required as TCM's, there are plans for improved public transit and transit facilities. Additional efforts that contribute to emissions reductions include the 2006 Commute Trip Reduction (CTR) Efficiency Act that replaced the 1991 CTR Act. The CTR program calls for reduction of single occupant vehicle travel by major employers in the affected Urban Growth Areas of Clark County. As required by the CTR Efficiency Act, the RTC Board of Directors adopted RTC's Regional CTR Plan and local CTR Plans for Vancouver, Camas, Washougal and unincorporated Clark County in early October 2007 (Resolution 10-07-21). Vancouver has also voluntarily implementing a variety of local programs and promotions to encourage commute trip reduction for non-CTR employers.

Chapter 2: Financial Plan and Resources

INTRODUCTION

Federal rules require that Transportation Improvement Programs (TIP) prepared by MPOs include a financial plan that demonstrates that the program is financially realistic for each year of the TIP. The MPO, public transit agencies, and State cooperatively develop estimates of funds that are reasonably expected to be available to support program implementation. These estimates are then used by RTC to ensure that projects identified in the TIP can be funded within the anticipated revenue stream. This Chapter contains the financial plan including a description of assumptions and revenue sources available for transportation projects in the Transportation Improvement Program.

It is important to note that although the information presented in the financial plan covers sources of revenue and expenditures on all transportation projects, only the projects that are federally funded or regionally significant are specifically listed in the TIP.

The TIP is financially constrained, meaning that the amount of funding programmed does not exceed the amount of funding estimated to be available. All projects programmed in the TIP are considered to have a reasonable expectation of being fully funded, even if funding is outside of the four-year TIP program period.

Assumptions

Projects programmed in the Transportation Improvement Program (TIP) reflect costs in year of expenditure dollars. The financial plan assumes that 100 percent of federal allocations will be available. For funding sources with a regional allocation (Section 5307, CMAQ, STP) the number of dollars available is based on the previous allocations or estimates produced by the Washington State Department of Transportation. For State or Federal selected funding sources, the regional total is assumed to be equal to the total of projects selected by the Washington State Department of Transportation or by federal agencies.

Operation and Maintenance Cost

Maintenance and preservation costs for state and local agencies are being estimated based on historical data from the WSDOT Finance Division and the Southwest Region.

Maintenance can cost 4 to 8 times more when deferred.

Before consideration can be given to system expansion, the region needs to ensure that sufficient money is available to adequately maintain, preserve and operate the transportation system already in existence. It costs, on average, \$64.2 million annually to maintain and operate the roadway system in Clark County.

In 2007, WSDOT reported on maintenance costs for the state highway system. The WSDOT analysis showed that in 2007 State highway maintenance costs about \$27.97 per registered vehicle per year.

The following chart shows the maintenance costs by category.

Figure 4-5: Maintenance costs by category

In 2007, the cost to maintain the state highway system was \$24.97 per registered vehicle. More than half that cost (52%) was for traffic control and snow and ice removal.

Over the last 13 years, Clark County and the cities in the region have spent more than 37% of their local transportation revenue on preservation and maintenance. Much of the region's infrastructure was built many decades ago and will require significant efforts in preservation, or will need to be replaced over the next three decades. As the transportation system ages and grows over the 21-year period, transportation agencies anticipate that maintenance and preservation needs may require a greater share of transportation revenues in the future due to expanded road miles to maintain as well as the costs of deferred maintenance. Consequently, the proportion of transportation dollars needed to preserve and maintain infrastructure may increase and could require tradeoffs between making capital investment and preserving system integrity.

The estimated annual cost of operating C-TRAN's existing service in 2013 is about \$45 million which is expected to rise as C-TRAN increases the size of bus fleet and expands its transit facilities in the future. C-TRAN's 2030 Plan, adopted by the C-TRAN Board of Directors in June 2010, preserves existing bus service and looks to future needs by: adding new bus routes; adding frequency on existing bus routes; constructing bus rapid transit in the Fourth Plain Corridor; and expanding paratransit service to meet growing demand. Fixed route service hours are projected to increase by 44% to 367,000 hours. Additionally, as the Clark County population ages, the demand for paratransit service will increase, resulting in a greater portion of available resources supporting this service. Paratransit service hours, for example, are projected to more than double, increasing from 83,000 annual service hours in 2010 to 169,000 hours in 2035.

The following table summarizes preservation and maintenance costs for local and state facilities based on historical expenditures over the last 10 years. Annual transit information is from C-TRAN's 2010 Annual Financial Report. 21-year data is from C-TRAN's 2030 Plan.

Table 4-2: Estimated Preservation and Maintenance Costs

Agency	Annual	RTP 21-years
WSDOT	\$11,480,047	\$241,080,993
Clark County and Cities	\$56,704,773	\$1,346,370,215
Total Roadway	\$68,184,820	\$1,587,451,208
Transit Operations	\$47,210,000	\$1,702,500,439

Source: WSDOT, C-TRAN

DESCRIPTION OF REVENUE SOURCES

FEDERAL

The federal gas tax and other transportation fees and taxes are the major federal revenue sources for transportation funding. On July 6, 2012, the President signed into law the Moving Ahead for Progress in the 21st Century Act (MAP-21). MAP-21 provided funding for fiscal years 2013 and 2014, and has continued thru short-term extension as Congress works to develop a long-term funding plan. MAP-21 incorporated performance measures to provide a more efficient investment of Federal transportation funds. MAP-21 restructures core transportation programs with programs created, eliminated, or restructured under other programs. This document includes a brief description of MAP-21 programs.

National Highway Performance Program (NHPP)

This program provides support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in the State's asset management plan for the NHS. Under MAP-21 the Nation Highway System is expanded to include all principal arterials.

Surface Transportation Program (STP)

This program provides flexible funding that may be used for projects to preserve and improve the conditions and performance of any Federal-aid highway, bridge, and tunnel on any public road. This includes improvements to roads, pedestrian and bicycle infrastructure, and transit capital projects. STP funds are divided between the follow programs:

- ◆ **STP-Urban Large (STP-UL):** Formula allocation to the Clark County Transportation Management Area based on the population of the Vancouver Urban boundary, which includes the urban area of Vancouver, Battle Ground, Camas, and Washougal. RTC (MPO) selects projects for funding.

- ◆ **STP-Rural (STP-R):** Formula allocation for projects outside the Urban Area boundary. RTC (MPO) selects projects for funding.

◆ **STP-State (STP):** Formula allocation to the Washington State Department of Transportation, for use on State highway projects. The State selects projects.

Highway Safety Improvement Program (HSIP)

This program is intended to achieve a significant reduction in traffic fatalities and serious injuries on all public roads. The HSIP requires a data-driven, strategic approach to improving highway safety.

Congestion Mitigation and Air Quality (CMAQ)

This program provides a flexible funding source for transportation projects and programs to help meet the requirements of the Clean Air Act. Funding is available to reduce congestion and improve air quality for areas that do not meet the National Ambient Air Quality Standards for Ozone, carbon monoxide, or particulate matters and for former nonattainment areas that are now in compliance (maintenance areas).

Transportation Alternatives Program (TAP)

MAP-21 established a new program to provide for a variety of alternative transportation projects, including many that were previously eligible activities under separately funded programs. The TAP replaces the funding from Recreational Trails, Safe Routes to School, and several other discretionary programs, wrapping them into a single funding source.

Community Development Block Grant (CDBG)

CDBG funds are administered by the Department of Housing and Urban Development (HUD). Funds can be used for public facilities, economic development, housing, and comprehensive projects which benefit low and moderate income households. Projects are selected by the county.

FTA Section 5307

This program provides grants to Urbanized Areas (UZA) for public transportation capital, planning, job access and reverse commute projects, as well as operating expenses in certain circumstances. These funds constitute a core investment in the enhancement and revitalization of public transportation systems in the nation's urbanized areas, which depend on public transportation to improve mobility and reduce congestion. Funds are allocated to the region.

FTA Section 5309

Provides grants for new and expanded rail, bus rapid transit, and ferry systems that reflect local priorities to improve transportation options in key corridors. These are discretionary funds.

FTA Section 5310

This program is intended to enhance mobility for seniors and persons with disabilities by providing funds for programs to serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services.

**FTA Section 5337**

A new formula-based State of Good Repair program is dedicated to repairing and upgrading the nation's rail transit systems along with high-intensity motor bus systems that use high-occupancy vehicle lanes, including bus rapid transit (BRT). These funds reflect a commitment to ensuring that public transit operates safely, efficiently, reliably, and sustainably so that communities can offer balanced transportation choices that help to improve mobility, reduce congestion, and encourage economic development.

FTA Section 5339

Provides capital funding to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities.

STATE

On the State level, the Motor Vehicle Fuel Tax is the primary funding source for highway maintenance and arterial construction. In addition, the state has other taxes and fees that support the funding of transportation improvements. Some of the programs funded by these revenues are described below:

Connecting Washington (CWA)

In 2015, the state passed a transportation investment package known as Connecting Washington (CWA). This package spends \$8.8 billion on state and local road projects, \$1.4 billion on maintenance and preservation, about \$1 billion will go to non-highway projects, and a portion is allocated to local jurisdictions.

Washington State Department of Transportation (WSDOT)

The Washington State Department of Transportation administers state and federal funded state highway projects. State transportation revenues are divided into separate programs. The budget for these programs is determined by the state legislature. WSDOT then prioritizes projects and determines which projects can be constructed within the budget of each program.

WSDOT Grant Programs

WSDOT administers many transportation related grants that are available to local agencies. However, most of these programs are dependent on the legislature allocating funding and can vary from year to year.

Transportation Improvement Board (TIB) Programs

The Washington State Legislature created the Transportation Improvement Board (TIB) to foster state investment in quality local transportation projects. The TIB distributes grant funding, which comes from the revenue generated by three cents of the statewide gas tax, to cities and urban counties for funding transportation projects. The TIB identifies and funds the highest ranking transportation projects based on criteria established by the Board for each program.

- ◆ **Urban Arterial Program (UAP):** Funding provided to improve safety and mobility along arterial streets in urban areas. The UAP program requires a minimum 20% local match.
- ◆ **Urban Corridor Program (UCP):** Funding provided for arterial street improvements that are coordinated among governmental agencies and support economic development. The UCP program requires a minimum 20% local match.
- ◆ **Sidewalk Program (SP):** Funding provided for pedestrian projects that enhance and promote pedestrian safety and mobility. There is both an urban and small city sidewalk program. The Urban program requires a minimum 20% local match, while the Small City program generally requires a 5% match.

- ◆ **Small City Arterial Program (SCAP):** Funding provided to preserve and improve the arterial roadway system for cities under 5,000 population. A local match of 5% or greater is required; a jurisdiction with a population under 500 needs 0% local match.
- ◆ **Small City Pavement Preservation Program (SCPPP):** Provides funding for rehabilitation and maintenance of the small city roadway system.
- ◆ **Federal Match:** Funding provided to meet the local match of some federally funded projects in small cities (population under 5,000). The program provides match for federal Bridge, TEA-21, and FEMA projects. The match varies by program between 12.5% and 20%. The Transportation Improvement Board funds are made available following approval of federal funds.

County Road Administration Board (CRAB)

The County Road Administration Board (CRAB) was created by the Legislature in 1965 to provide statutory oversight of Washington's thirty-nine county road departments. CRAB manages two grant programs to assist counties in meeting their transportation needs.

- ◆ **Rural Arterial Program (RAP):** This is a state fund for financing arterial road improvements in rural areas. RAP funds cannot be used for right-of-way. Projects are rated by five criteria: (1) structural ability to carry loads; (2) capacity to move traffic at reasonable speeds; (3) adequacy of alignment and related geometrics; (4) accident experience; and (5) fatal accident experience. Projects are selected by the County Road Administration Board. The costs are shared 90% State and 10% local match.
- ◆ **County Arterial Preservation Program (CAPP):** Funding is provided for the preservation of existing paved county arterials. Funding is provided to counties as direct allocation based on paved arterial lane miles by the County Road Administration Board.

Washington State Recreation and Conservation Office (RCO)

The RCO manages nine grant programs, including the largest park grant program in the state of Washington. RTO creates and maintains opportunities for recreation, protects the best of the state's wild lands, and contributes to the state's effort to recover salmon from the brink of extinction.

Community Economic Revitalization Board (CERB)

CERB was established by the legislature to make loans and/or grants for public facilities, including roads, which will stimulate investment and job opportunities, reduce unemployment, and foster economic development. The Community Economic Revitalization Board selects projects.

Public Works Trust Fund (PWTF)

The Public Works Board was created by the legislature to meet public works needs to sustain livable communities and selects projects for the Public Works Trust Fund. The Public Works Trust Fund provides low interest loans to local governments for infrastructure improvements and is funded by utility taxes. These loans have a 4-year term for pre-construction and 20-years for construction with an interest rate of one-half percent. The program is dependent on the Washington State Legislature funding the program.

LOCAL

Local revenue comes from a variety of sources such as property tax and impact fees for highway projects and sales tax for transit projects. Other revenues include moneys from permits, fees, and taxes.

Property Tax

Clark County allocates a portion of their property taxes to the County Road Fund (Approximately \$2.25 per \$1,000 of assessed value). Cities also receive transportation dollars from the city's general funds, of which property taxes are a major revenue source.

Arterial Street Fund (ASF)

This is the distribution of the state gasoline tax to cities and counties based on each jurisdiction's population.

Transportation Impact Fees (TIF)

Transportation impact fees were authorized by the 1990 Legislature to address the impact of development activity on transportation facilities. Jurisdictions within Clark County have established Transportation Impact Fee programs. Generally, new developments and redevelopments are assessed a Traffic Impact Fee, based on their impact to the transportation system.

Road Improvement District (RID)

RID's can be formed and funded by properties benefiting from an improvement. They are usually formed at the request of property owners. Local government will build the project using revenue bonds from road improvement district.

Frontage Improvement Agreements

Most developments are required to construct frontage improvements. In cases where the development abuts a proposed road improvement project, it is often beneficial for the developer to pay local government for their share of the road improvement and for local government to construct the improvements as part of the overall capital project.

Latecomers Fees

According to State law, new developments and re-developments may be charged "Latecomer Fees" by the County for improvements that would have been required for their development, but have been constructed by the County.

Sales and Use Tax

C-TRAN's major revenue source is a 0.7% sales and use tax. A 0.3% sales tax that was approved in 1980, an additional 0.2% was approved by voters in 2005, and an additional 0.2% was approved by voters in 2011. This sales and use tax is a portion of the sales and use tax charged within Clark County. The tax rate can be raised to as much as 0.9% with voter approval.

RCW 81.104 (High Capacity Transit Legislation)

RCW 81.104 authorizes local jurisdictions to plan for and finance high capacity transportation systems through voter-approved tax options. Funding options include an employer tax, special motor vehicle excise tax, and sales and use tax.

Transit-Fare

This is the amount of revenue generated by transit fare, ticket, and pass sales.

PROJECT SELECTION

Projects programmed in the first two years of the 2017-2020 Transportation Improvement Program constitute an “agreed to” list of projects for implementation. However, due to federal fiscal constraints in any one year and a statewide management of funds on a first come basis, implementation of projects in the year programmed cannot be guaranteed.

FINANCIAL FEASIBILITY

Financial feasibility is accomplished by demonstration that adequate resources are available to implement the projects programmed in the TIP. The TIP for Clark County demonstrates that it is a financially realistic program, in that projected revenue by program is adequate to meet the estimated cost of programmed projects for each year. As illustrated on Table 1 on the next page, there is a remaining balance of revenue between years 2017-2020.

Table 1: 2017-2020 Financial Feasibility Summary*(Cost in Thousands of Dollars)*

Funding Type	Year	Carry-Over Previous Yr.	Allocation	Available Revenue	Program Totals	Remaining Funds

Chapter 3: 2017-2020 Funding Secured Projects

INTRODUCTION

Chapter III includes the list of all federally funded and regionally significant funded transportation projects within the Clark County, Washington region. Only regionally significant projects that plan to obligate funds within the next four years are included in this chapter. The list of projects included in the Transportation Improvement Program (TIP) often change and the most updated list of projects can be found at <http://wsdot.wa.gov/LocalPrograms/Projects/Reports/ProjectSearch.aspx>.

Projects programmed in the first two years of the 2017-2020 Transportation Improvement Program constitute an “agreed to” list of projects for implementation. The third and fourth years of projects will proceed it future years.

Program Summary

The program of planned projects for 2017-2020 is provided on the annual summary sheets beginning on page 30. The annual program summary includes the projects by funding source and project phase. Project phases include Preliminary Engineering (PE), Right-of-Way (RW), and Construction (CN). Project information includes project priority, sponsoring agency, project name, project description, and funding information.

STIP Project Information

State Transportation Improvement Program detailed project pages are included after the Program Summary and begin following page 36 (STIP pages 1-70). In this section, detailed information is provided on each project individually. This detailed project information includes project title, project description, funding information and other project information. Projects are listed in alphabetical order by agency and project name.

Pioneer Street Railroad Overpass

Construct third phase of vehicle/pedestrian overpass over the BNSF Railway (BNSF) north-south mainline in the City of Ridgefield, Washington, and removal of two existing grade crossings. Major work elements will be over-crossing structure, retaining walls, new roadway, curbs and sidewalks, illumination, traffic signal, storm sewers and replacement of lift station. Phase I of this project includes approximately 200' of Pioneer Street west of Main Ave. adjacent to Overlook Park. Phase II of the project includes approximately 850' approach road on west side of project. Phase III includes the construction of the over-crossing structure.

APPENDICES

APPENDIX A: Major Project List

APPENDIX B: CMAQ Air Quality Projects

APPENDIX C: Public Comments

APPENDIX D: 2017-2020 TIP Project Analysis

APPENDIX A: Major Project List

Introduction

Federal regulation requires that the status of major projects from the preceding TIP be provided in the current TIP document. Given that the TIP is developed in late summer, an estimate of project development is made based on current plans and status may change before the end of the calendar year. The following provides a summary of estimated project status from the 2016-2019 TIP:

In addition, RTC develops an annual list of all projects that have obligated federal funds in the preceding year. This annual listing of obligated projects will be prepared and published on the RTC website no later than March 31st of each year.

Table 6: Major Projects from 2016-2019 TIP That Were Implemented (Obligated)

Funding Program	Agency	Project Name	Phase	Federal Funds	State Funds	Local Funds	Total Funds
HSIP	WSDOT	I-5/NB Off Ramp at Fourth Plain	CN	\$471,500		\$9,600	\$481,100
CMAQ	Clark County	Working to Refine IntelliGent Highway Transp.	PE	\$685,400		\$234,600	\$920,000
CMAQ	WSDOT	Vancouver Urban ITS Device Infill	CN	\$651,900		\$143,100	\$795,000
CMAQ	Vancouver	Main St. – Columbia St. Traffic Signal	CN	\$855,000		\$133,000	\$988,000
STP-UL	Vancouver	NE 18 th Street, Four Seasons to 136 th Av.	CN	\$4,000,000		\$7,000,000	\$11,000,000

(PE) Preliminary Engineering, (RW) Right of Way, and (CN) Construction

Table 7: Major Projects from 2016-2019 TIP That Were Delayed

Funding Program	Agency	Project Name	Phase	Federal Funds	State Funds	Local Funds	Total Funds
SRTS	Washougal	Jemtegaard Trail Improvements	CN	\$451,000			\$451,000

(PE) Preliminary Engineering, (RW) Right of Way, and (CN) Construction

Table 8: Federally Funded Pedestrian and Bicycle Project from the 2016-2019 TIP That Were Obligated

Funding Program	Agency	Project Name	Phase	Federal Funds	State Funds	Local Funds	Total Funds
STP-UL	Clark County	Highway 99 Pedestrian/Bicycle Improvements	PE	\$100,000			\$100,000
CMAQ	Vancouver	BRT Corridor Fort Vancouver Way Sidewalks	PE	\$108,000		\$17,000	\$125,000
STP-UL	Vancouver	NE 18 th Street, Four Seasons to 136 th Av.	CN	\$4,000,000		\$7,000,000	\$11,000,000
Enhancement	Vancouver	Vancouver Waterfront Trail	CN	\$600,000		\$674,068	\$1,274,068

(PE) Preliminary Engineering, (RW) Right of Way, and (CN) Construction

APPENDIX B: CMAQ Air Quality Projects

Introduction

The following list of projects is seeking CMAQ funding within the 2017-2020 Transportation Improvement Program for Clark County. This section identifies the air quality benefits for each project by providing a preliminary quantitative air quality analysis for each project.

Table 9: CMAQ Air Quality Project Status

Agency	Project Title	Project Description	Air Quality Benefits (kg per day)		
			CO	HC	NOx
Battle Ground	Small City ATMAS	Expansion of the Clark County’s ATMS license, update traffic controllers, installation of wireless radios to connect to existing fiber system, and installation of cameras within cities of Battle Ground, Camas, and Washougal.	-30.659	-3.152	7.125
C-TRAN	Open Trip Planner and Alerts System	Implement multimodal regional trip planner and mapping system. The project also includes passenger alert information system.	-14.058	-1.386	-1.188
C-TRAN	Hybrid Buses	Replace 4 to 5 buses with diesel/electric hybrid buses.	-1.141	-0.355	1.072
C-TRAN	Hybrid Buses	Expansion of 6 to 7 new diesel/electric hybrid buses	-10.773	-19.893	-92.120
C-TRAN	Mill Plain TSP Phase II	Transit Signal Priority from Fisher Landing to Downtown Vancouver.	-10.544	-1.131	.0732
Clark County	Signal Time, Evaluation, Verification and Enhancement	Analyze traffic operations using collected data to improve traffic signal timing on Padden Parkway, Highway 99, NE 99th St., 139th St., and Tenny/134th St. corridors. Project includes installation of additional Bluetooth readers and methodology of evaluation.	-129.091	-13.273	30.000
Clark County	Working to Refine Intelligent Highway Transportation	Adaptive signals on NE 139 th St. between NW 2 nd Av. and NE 20 th Av.	-22.591	-2.323	5.250
Clark County	Signal Time, Evaluation, Verification and Enhancement Phase 2	Add ITS devices to additional county intersections, develop performance reports and improve connection to regional data warehouse.	-10.005	-1.029	2.325
Vancouver	Fourth Plain Subarea Sidewalk Infill Project	Construct sidewalks to improve pedestrian facilities along Neals Lane and Rossiter Lane in the vicinity of Fourth Plain Boulevard.	-1.098	-0.093	-0.073
Vancouver	Main St.-Columbia St. Traffic Signal Integration	Install conduits and fiber optic cables, add bike lane facilities, integrate traffic signals, and coordinate signal timing. Includes	-41.960	-4.310	9.750

		before and after study.			
Vancouver	BRT Corridor Fort Vancouver Way/Mcloughlin Sidewalk Infill and Pedestrian Signal	Sidewalks and curb ramps on west side of Ft. Vancouver Way and at McLoughlin/G Street. HAWK signal in near Clark College.	-1.142	-0.096	-0.076
Vancouver	Mill Plain Blvd. Arrival on Green Improvement	Install signal equipment on Mill Plain between Andresen Rd. and 155 th Av. to improve signal coordination.	-24.205	-2.489	5.625
WSDOT	SR-503, Fourth Plain to SR-502 Device Infill	Finalize the communications and ATIS device infill for the SR-503 corridor.	-23.640	-19.715	-20.094
WSDOT	Vancouver ITS Device Infill	This project would finalize the installation of traffic surveillance cameras and traffic detection within the I-5, I-205, and SR-14 corridors.	-10.690	-0.879	-1.825
WSDOT	SR-503 ATIS Infill-I/S Bypass; 4 th Plain to Main St. and Signal Study	ATIS infill with VMS's, data stations, cameras and Ethernet conversions. In addition, this project will fund an investigation of demand-responsive or adaptive signalized corridor between Fourth Plain and NE 119 th St.	-5.345	-0.040	-0.452
WSDOT	SR-14 ATIS Infill; I-5 to Evergreen	Provide fiber optic communication connection, data stations, and traffic surveillance cameras.	-10.690	-0.879	-1.825
WSDOT	Centralized Signal System-Joint ATMS*	Migration of WSDOT to regional centralized signal system.	NA	NA	NA
WSDOT	Centralized Signal System Enhancement	Expand/enhance ATMS capabilities at various intersections within WSDOT's signalized principal arterial corridors.	-67.773	-6.968	15.750

* The Centralized Signal System project will provide an air quality benefit, but a reliable quantitative evaluation would be difficult to complete.

APPENDIX C: Public Comments

Introduction

Citizens and appropriate parties were provided a reasonable opportunity to comment on the 2017-2020 Transportation Improvement Program (TIP) through a public involvement process. This process includes a minimum of a 30 day public comment period that was held from August 31, 2016 until October 4, 2016. Public comment period concluded with testimony at the October 4, 2016 RTC Board meeting. The draft TIP document and project information was made available during the public comment period. The attached table includes all comments received along with RTC staff responses:

Table 10: Public Comments

Project	Support Project	Comment	Staff Response
SR-14, I-205 to 164 th Av.	Yes	Wanted to know why the project was not included in the TIP?	Staff explained how projects become funded and invited the citizen to contact WSDOT and their legislative representatives to express support for the project.

APPENDIX D: 2017-2020 TIP Project Analysis

Introduction

Appendix D provides an overview of the projects included in the 2017-2020 TIP including project type, spending by project type, and project locations.

Projects by Type

The projects in the TIP have been classified by the primary project type to represent the number and dollars associated with different types of projects. The difficulty is that most projects include multiple project types, and for the purpose of this analysis only the primary project type is included. Projects are classified by the following project types:

- ◆ **Bicycle & Pedestrian:** This includes standalone projects that primarily encourage walking and bicycling. This can include sidewalks, bicycle lanes, paths, improved pedestrian crossing, etc.
- ◆ **Bridge:** This represents all work that is accomplished on bridges. This can include new bridge construction, bridge replacement, repair, and painting.
- ◆ **Planning:** This is about preparing, analyzing, and implementing studies and plans to improve the transport systems.
- ◆ **Preservation:** This represents a proactive approach in maintaining the existing transportation system. This can include pavement overlay, pavement repair, and transit preventative maintenance.
- ◆ **Rail:** This represents movement of goods by way of wheeled vehicles running on rails. This would include improvements to BNSF rail line and associated spurs.
- ◆ **Road Improvement:** This represents an improvement that enhances a roadway for motor vehicles. This can include road widening, reconstruction, intersection improvements, and other geometric improvements.
- ◆ **Safety:** This represents improvements to the transportation system that are primarily intended to reduce the risk of a collision. This could include intersection improvements, signage, lane markings, and guardrail.

- ◆ Transit: This includes all capital and planning projects of the public transit service which C-TRAN provides within Clark County.
- ◆ TSMO: Transportation System Management and Operations are low-cost projects that are implemented to optimize the performance of existing transportation systems. These projects often include technology based improvements such as traffic detection and signal improvements.

Table 11: Projects by Type

Project Type	Number of Projects	% of Projects	Total Programmed	% of Total Programmed
Bicycle & Pedestrian	10	15%	\$9,111,524	4%
Bridge	3	4%	\$36,174,568	17%
Planning	3	4%	\$2,491,330	1%
Preservation	6	9%	\$19,237,069	9%
Rail	1	1%	\$16,300,000	7%
Road Improvement	17	25%	\$72,641,290	33%
Safety	15	22%	\$10,283,102	5%
Transit	5	7%	\$48,153,000	22%
TSMO	9	13%	\$4,926,125	2%
Total	69	100%	\$219,318,008	100%
